Project Manager of Pathways to CyberSecurity Named

MILLERSVILLE - Anne Arundel Workforce Development Corporation (AAWDC) named Thomas Francovitch as Project Manager of its Pathways to CyberSecurity Job Training Program last week. Francovitch will be responsible for the program development and daily operation of AAWDC's cybersecurity grant project. He will coordinate with area community colleges and employers to connect job seekers and incumbent workers to cybersecurity training and employment.

Francovitch has an extensive background in serving businesses in Anne Arundel County, most notably as the Business Resource Center Director with the Anne Arundel Economic Development Corporation from 2006-2010. His experience in science and technology span education in Industrial Engineering and Systems Management. In addition, he served as the Towson University/Small Business Development Corporation High-Tech Counselor for the Central Region of Maryland.

The Department of Labor awarded the Pathways to CyberSecurity Careers Consortium, administered by AAWDC, a \$4.9 million job training grant June 30, 2010. The Consortium will assist over 1,000 eligible individuals in

gaining stackable certifications to address the job shortage in the high-demand field of cybersecurity.

For more information on cybersecurity job training, call 410-987-3890 x 250 or email: cyberinfo@aawdc.org.

#

AAWDC operates seven One-Stop Career Centers and specialized programs that offer services to businesses and job seekers. Services include recruitment, retention and training funds for business; and job search guidance, workshops and training assistance for job seekers.
